

Ser. No. 09/596,362
Amendment after Final

CLAIMS:

X
Cancel amended claims 7 through 9 and substitute therefore the following new dependent claims 10 through 12:

10. (new) The method of claim 1 wherein said anticraving composition is administered orally by way of a non-alcoholic wine beverage.

E1
11. (new) The method of claim 1 wherein said anticraving composition is administered orally by way of a non-alcoholic beer beverage.

12. (new) The method of claim 1 wherein said anticraving composition is administered orally by way of a distilled spirit beverage in regard to which the alcohol has been removed and replaced by kavapyrones.

ABSTRACT (CLEAN VERSION):

Amend the abstract to read as follows:

E2
Administered anticraving compositions are disclosed for treating patients addicted to alcohol comprising an effective amount of at least one alpha-pyrone compound formulated into a physiologically acceptable carrier medium. Additionally, a method of oral administration of the anticraving compounds is disclosed where an effective amount of at least one alpha-pyrone compound is formulated into a wine, beer or distilled spirit where the alcohol has been removed and replaced by one or more kavapyrones.
